

intensive
age refining
treatment:
0.5% pure retinol
night

Highly potent 0.5% pure retinol paired with a host of anti-aging, hydrating and soothing agents offers outstanding age control benefits. This exceptional restorative nighttime treatment effectively increases collagen and elastin production, reduces free radical damage and prevents the occurrence of future visible aging, delivering the fastest results possible without a prescription.

before

Condition: fine lines, wrinkling and dehydrated skin around the eyes.*

after

Solution: used Creamy Cleanser, Intensive Age Refining Treatment, Après Peel® Hydrating Balm and Hydrator Plus SPF 30 daily over a one-week period.*

*Photos not retouched.

Key ingredients:

0.5% Pure Retinol (Vitamin A) – is converted to retinoic acid in the skin and helps to normalize cell turnover and increase water content in the epidermis. The retinol used in Intensive Age Refining Treatment is stable and completely pure, making it highly potent and effective. It stimulates the fibroblasts to produce additional collagen and elastin and evens pigmentation by inhibiting melanosomes from being transferred from the melanocytes into the keratinocytes.

Vigna Aconitifolia Seed Extract – is a botanical that has demonstrated the ability to stimulate the growth factors that increase epidermal cell turnover. It is also effective in the protection of the dermis from age-related breakdown as well as stimulating the fibroblasts to produce collagen.

Sodium Hyaluronate – is a form of hyaluronic acid, which is a naturally occurring glycosaminoglycan with exceptional lubricating qualities. Its ability to hold 1,000 times its weight in water plays an important role in cell protection, hydration, lubrication and maintenance of the structural integrity of tissues.

Glycerophosphoinositol Lysine - helps to reduce the topical inflammation and irritation often associated with pure retinol and retinoic acid products.

Superoxide Dismutase (SOD) – is an enzyme that protects oxygen-metabolizing cells against harmful effects of superoxide free radicals.

Panthenol (Pro-Vitamin B-5) – improves and increases the moisture-retention capacity of the skin. It also provides anti-inflammatory and antioxidant benefits.

Directions for use: in the evening, apply a pea-sized amount after cleansing and toning. Begin by limiting use to twice a week, gradually increasing application frequency to every other night, and then advancing to each evening or as tolerated. Follow with the appropriate PCA SKIN moisturizer. Mild irritation may initially be experienced and is not a sign of a negative complication. This product is indicated for use in the evening only. Daily broad-spectrum sun protection is critical while using this product.
