

healthy, full lips. reinvented.

New and improved **peptide lip therapy** from PCA SKIN is the answer for healthy, full and flake-free lips. Its smooth and silky base delivers the newest in peptide technology for maximum increases in lip volume. Palmitoyl tetrapeptide-38 is clinically proven to stimulate fibroblasts, increasing collagen I and IV deposition and fibronectin synthesis, leading to increased volume and density of the lips. Portulaca pilosa extract helps restore volume and firmness. **peptide lip therapy** is the ultimate choice for achieving and maintaining healthy lips.
